# Innovation and implementation of complex rehabilitation technology: state-of-the-art, ideas and solutions

TUESDAY 20TH OF APRIL 2021

**Interreg**  
Euregio Meuse-Rhine  
European Regional Development Fund

Ministerium für Wirtschaft, Energie, Industrie, Mittelstand und Handwerk des Landes Nordrhein-Westfalen

Vlaanderen  
is ondernemen

Provincie Noord-Brabant

provincie limburg

Rehabilitation experts continuously strive to further improve the (cost-)effectiveness of treatment for their patients. Rehabilitation technology, like robotics, sensors, new materials and new production processes for tools, may aid in this endeavour.

The Euregional network i2-CoRT aims to accelerate innovation and implementation of complex rehabilitation technology, with the support of the Interreg V-A Euregion Meuse-Rhine programme ([www.i2-CoRT.eu](http://www.i2-CoRT.eu)). The i2-CoRT partners would like to invite you to a symposium where clinical experts, companies and scientists will present state-of-the-art ideas and solutions/products in rehabilitation technology they have been working on. Also, the i2-CoRT clinical test centres in the Euregion will be presented.

More information and the program will follow, but be sure to **SAVE THIS DATE:**

**TUESDAY 20TH of APRIL 2021**

**Between 9:30 and 16:00 hours**

## Venue:

The i2-CoRT symposium will be online.

## Target groups:

This symposium will be interesting for all rehabilitation specialists, therapists, researchers, companies, organizations and patients concerned within this field.

Feel free to share this Save the Date with your network through mail and newsletters and/or on your website.
